

NOTICE: Effective Friday 10/20/23

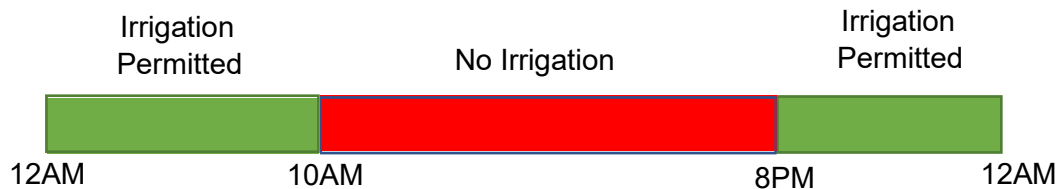

G&W Water Supply Corporation is moving down to STAGE 1 Drought

Contingency

Effective Friday 10/20/23 G&W Water Supply Corporation is moving down to Stage 1 of the Drought Contingency Plan due to recent cooler temperatures and rainfall. Stage 1 Drought Contingency requests customers to voluntarily limit irrigation of landscaped areas based on the designated days and time frames outlined below. G&W Water Supply Corporation thanks everyone for their cooperation and continued support. G&W Water Supply Corporation asks that all customers continue to practice water conservation and to minimize or discontinue water use for non-essential purposes.

Stage 1 Restrictions are voluntary.

Outdoor irrigation is voluntarily limited to **2 days per week.**

Allowed

- Lawn irrigation is voluntarily limited to 2 days per week based on the designated days and time frames above.
- Use of automated irrigation systems or handheld irrigation systems with timers.
- Hand watering and caring for livestock, trees, and shrubs.
- ***Soaking** of the house foundation during designated days and timeframe.
- Implement water conservation practices in landscape irrigation, exterior cleaning, personal hygiene, and cooking around the home or business.

Objective

- Achieve a voluntary 5 percent reduction in 10,000 gallons. This is achieved through load-leveling water usage across multiple days, which allows the system to replenish water reserves.
