IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Requirements not met for G & W WSC #2370063

Our system failed to collect every required coliform sample for Waller PWS # 2370063. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During compliance period January 1st through January 31st, 2021 we neglected to test or monitor one site in our Waller system for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

There is nothing you need to do at this time. You may continue to drink the water. If a situation was to arise where the water is no longer safe to drink, we are required to notify you within 24 hours.

We have collected the required sample April 27th, 2021 and the sample was acceptable. For more information please contact G & W Water Supply Corporation at 936-372-9858 or at G & W Water Supply Corporation P O Box 1219 Waller, Texas 77484.

Please share this information with all other people who drink this water, especially those who may not received this notice directly(people in nursing homes, apartments, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by G & W WSC
Public Water System ID# TX2370063.
